

# Hoang Chinh Huu

## Experience

Mar – Jun 2024

**Front-end Website Developer • FPT INFORMATION SYSTEM CORPORATION •**  
Hanoi, Vietnam

- Developed a new feature (Permission Feature) for the Portal website for Security Operation Center service of FPT Information System DT Cyber Security Center.
- Updated other feature with the permission tab to improve the accessibility.
- Looked for solution in simplifying the complex process of adding a new tenant.
- Worked with other backend-developer and quality assurances officer to ensure that accurate information is displayed and search features are improved.

## Projects

### Pom-odoro

- **Purpose:** Created a clone Pomodoro web application that used the Pomodoro technique, an effective time management method.
- **Stack:** React, TailwindCSS
- Utilized **responsive design** and **cross-browser** compatibility principles to develop an attractive and functional website. This approach ensured a seamless experience across different browsers and devices.

### SongCuaTui

- **Purpose:** Designed the web application that mimicked the songs and album management system.
- **Stack:** Python, Flask, MongoDB
- Developed a **Flask API** to interact with the database and used **MongoDB** to manage database information. Implemented **responsive design** to ensure a seamless user experience.

### CoiPhimVui

- **Purpose:** Users could watch movie and explore a catalog of available titles and added them to their watchlists. The application also included features for recommending content based on users' viewing history and preferences.
- **Stack:** Python, Flask, MongoDB
- Created a **Flask API** for database interaction and utilized **MongoDB** for

## Education

 **University of Lethbridge**  
(Lethbridge, Canada),  
Bachelor of Science  
2020-2022

 **Southern Alberta Institute  
of technology (SAIT)**  
(Alberta, Canada)  
Information Technology  
Diploma,  
2018-2020

database management. Ensured a seamless user experience through the implementation of **responsive design**.

## HuuShop

- **Purpose:** Created an individual online shop to facilitate online buying and selling of goods or services.
- **Stack: React, Node.js**
- Utilized React and Node.js to build a website featuring **account creation** and **user authentication**.

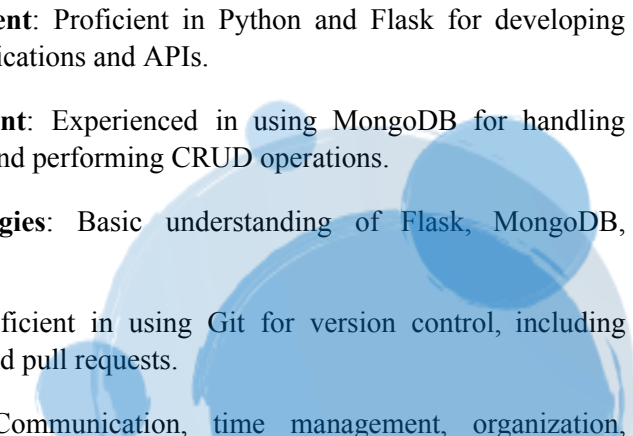

## DEMO Tiki Clone

- **Purpose:** This ecommerce project served as a demonstration of your technical skills in web development, including front-end and back-end technologies.
- **Stack: ReactJS, Bootstrap, Node.js**
- Developed a project featuring **account creation** and **user authentication** using ReactJS, Bootstrap, and Node.js.

## Button Smashin Race

- **Purpose:** Two players racing game with keyboard controls, sound effects, and score tracking.
- **Stack: HTML, CSS, JavaScript, jQuery**
- Utilized HTML, CSS, JavaScript, and jQuery to incorporate background music, sound effects, and winner declaration, and also learned the Web Audio API for this purpose.

## Skills

- **Web Development Basics:** Proficient in HTML, CSS, and JavaScript.
  - **Front-End Frameworks and Libraries:** Advanced skills in ReactJS for building dynamic user interfaces and TailwindCSS for creating responsive, utility-first CSS designs.
  - **Back-End Development:** Proficient in Python and Flask for developing robust server-side applications and APIs.
  - **Database Management:** Experienced in using MongoDB for handling database information and performing CRUD operations.
  - **Additional Technologies:** Basic understanding of Flask, MongoDB, Node.js, and SQL.
  - **Version Control:** Proficient in using Git for version control, including branching, merging, and pull requests.
  - **Additional Skills:** Communication, time management, organization,
- 

teamwork, problem-solving, flexibility, and adaptability.
